

First announcement

ISAP/EPASG Conference in Vienna 2017

Anti-Infective PK/PD – Integrating knowledge and innovating therapies

Friday, 21 April 2017, 9.00-17.00

Van Swieten Saal at the University campus, Van Swieten - Gasse 1a, 1090 Wien

Topics:

- Research and knowledge gaps in PK/PD
- Beyond blood levels and MICs
- Impact of MIC vs. resistance mechanism
- PK/PD of resistance suppression: Knowns and unknowns
- Wanted: resistance driving dosing regimens
- PK/PD drivers of resistance: 'Omics' as part of the Jigsaw
- PK/PD focused clinical development of new antibiotics
- PK/PD of adjuvants and potentiators
- From bench to bedside
- Rejuvenate old antibiotics
- How to find the best antibiotic combinations
- Dose optimisation where it matters most
- Early definition of breakpoints
- Learning from other fields

Audience: Infectious disease specialists, clinical microbiologists, pharmacists, pharmacologists, toxicologists, biomedical scientists, drug development specialists

Young investigators: special session (1 hour) with speed presentations: 4 minutes, 4-minute discussion; selected from submitted abstracts. Travel awards depending on available funding

Chair: Ursula Theuretzbacher / Markus Zeitlinger

Organising committee: Roger Nation, Françoise Van Bambeke, Brian Tsuji, William Couet, Jason Roberts, Lena Friberg, Hartmut Derendorf, Alasdair MacGowan, Vincent Tam, Johan Mouton, Jian Li, Paul Tulkens, Sebastian Wicha
